

IEC Power Cords, IEC 60320 C17 Connector Plug, Type C17, 2 poles, 2 wires, UL, ETL, VDE, TUV, SAA, KC, PSE Certified

Plug and Connector Type: IEC 60320 C17

IEC Power Cords, rated 10A, 13A, 15A at 125V/250V, built around the Type C17 two-pole connector that mates with an IEC 60320 C18 inlet. This IEC AC power cord follows the IEC 60320 C17 standard and is available with UL, ETL, VDE, TUV, SAA, KC and PSE certification. As the ungrounded Class II equivalent of a C13, the non-rewirable fully molded C17 connector carries line and neutral contacts with no earth pin, and it is intended for double-insulated equipment. It works with flexible PVC-insulated or crosslinked rubber-insulated leads and is commonly used for game-console power supplies, televisions, audio devices, vacuum cleaners, CPAP machines and Class II products. Our factory molds these C17 cords in a slim ergonomic profile, with custom length, gauge and color; all are RoHS and REACH compliant.
