

Power Inlet & Outlet Boxes

30 Amp RV Power Outlet Box, NEMA TT-30R and 5-20R Duplex

RV Outlet Box - NEMA TT-30R receptacle plus one NEMA 5-20R duplex receptacle, 30 Amp at the TT-30R, 20 Amp at the 5-20R duplex 125 V

An RV power outlet box gives a trailer or a motorhome a place to plug in away from a campground. The TT-30R receptacle takes the 30 amp RV cord, and the 5-20R duplex next to it runs a vacuum, a light or a charger without unhooking the coach.

Both receptacles are 125V. The TT-30R is the travel trailer standard and nothing else fits it, which is why the box carries the pair: one connector for the coach, one general purpose outlet for everything else at the parking spot.

Specifications

Label	Value
Product Name:	30 Amp RV Power Outlet Box, NEMA TT-30R and 5-20R Duplex
Product Type:	RV Outlet Box
Connector Configuration:	NEMA TT-30R receptacle plus one NEMA 5-20R duplex receptacle
Maximum Current:	30 Amp at the TT-30R, 20 Amp at the 5-20R duplex
Voltage Rating:	125 V
Number of Poles and Wires:	TT-30R 2-pole 3-wire, 5-20R 2-pole 3-wire
Overcurrent Protection:	Not fitted. Supply the box from a 30 amp breaker in the panel, with GFCI protection on the 5-20R circuit
Enclosure and Cover:	Steel enclosure with a gasketed cover that closes over the plugged-in cords, pre-drilled mounting holes and plugged cable entries
Enclosure Material:	Powder-Coated Steel, Weatherproof Cover
Contact Material:	Nickel-Plated Brass, Pure Copper Conductive Parts
Safety Approvals:	ETL listed
Environmental Certifications:	RoHS, REACH, PAHS compliant
Color:	As shown; custom colors available on request
Testing:	Hi-Pot (Dielectric Withstand), Polarity (Pinout) and Continuity
Customization:	OEM / ODM; custom colors, packaging and labeling available
Country of Origin:	Made in China
Packing:	Standard Export Carton

Typical Applications

Driveways and side yards where a trailer is stored and topped up, small campgrounds and farm pads, workshops that host a camper, and job sites that need a 30 amp outlet plus ordinary 120V receptacles on one post.

Before You Wire It

Feed the box from a dedicated 30 amp circuit. The 5-20R receptacles need GFCI protection where the box is outdoors, and a TT-30R supplied from the same circuit is protected by the branch breaker.

Mount the box at a height that lets both cords hang with a drip loop, and close the cover over the cords rather than leaving it open against the wall so rain does not sit on the receptacles.

Ordering Notes

ETL listed. Samples are available, production runs start at 200 to 1000 pieces with 15 to 20 working days after the order and artwork are confirmed, and private label covers the enclosure label and the packing.
